

Sydney Blue Gum

EUCALYPTUS SALIGNA

QUALITY KILN DRIED TIMBER

Sydney Blue Gum

Introduction

Sydney Blue Gum is a popular species that grows on the New South Wales Coast. A large tree that has a distinctive bluish tinge to its smooth bark, it is very common in the Sydney and Blue Mountains area, thus the origins of its common name. Sydney Blue gum is a relatively straight grained timber, with some small amounts of interlocking. The beautiful colour and its strong and hard natural attributes make Sydney Blue Gum sort after for both domestic and commercial flooring project the world over.

Sydney Blue Gum

Grade Descriptions

Select Grade: The Features that are present in Select grade flooring are relatively small and few in number, and although they are visible the features do not dominate the appearance of the floor.

Standard Grade (Medium Feature): Flooring in this grade will be moderately featured. Gum veins, gum pockets, insect trails, burls and borer holes, are some of the characteristic's that will be more prevalent in Standard Grade

Feature Grade (High Feature): Feature grade flooring is heavily peppered with natural features particularly large gum veins.

Rustic Grade: A full featured floor to provide an old world charm. It may contain features that are more prominent than Feature Grade but with the structural integrity of a Feature Grade Floor.

Environmental Credentials

Hurford Hardwood is committed to our forests, our community and our future.

Underpinning our commitment is an ambitious hardwood reforestation project in our local surrounding area where we have purchase over 5000 hectares of land and have commenced a planting program that will see more than 25000 new plantation eucalypt saplings established each year.

Hurford Hardwood source a proportion of timber from private native forests with the balance procured from NSW State Forestry which is certified under the Australian Forestry Standards Chain of Custody. (AS4707 - 2006).

Hurford Hardwood insist that all timber produced from these forests is done so under the principles of Ecologically Sustainable Forest Management, a system developed to sustain the full range of commercial and conservation values of the natural forest diversity within ecological limits, for current and future generations.
